

My TrainingSession uses DateTimeFormatter.ofPattern("uuuu-MM-dd") with ResolverStyle.STRICT, but the project requirement says dd/MM/yyyy. What exactly should I change in my current inputDate() method and console prompts?

If the project requirement is `dd/MM/yyyy`, you need to change **three places** in your current code.

1. Change the DateTimeFormatter pattern

Current:

Java

```
private final DateTimeFormatter dateFormat =  
    DateTimeFormatter.ofPattern("uuuu-MM-dd")  
        .withResolverStyle(ResolverStyle.STRICT);
```

Change to:

Java
